## Migration of inventory data to 1C format

### Описание:

Mapped columns from the supplier's Excel format to the strict template required for 1C import. Used Power Query to transform date formats and merge category columns.

**Результат: Successful import of 10,000 SKU items into the warehouse system without validation errors.**

ID: 7554 31.12.2025

## Automate invoice splitting macro

### Описание:

Wrote a VBA macro to take a master list of transactions and split them into separate Excel files for each client. Added a script to auto-save these files as PDFs in a dated folder.

**Результат: Manual process reduced from 3 hours per week to a button click (2 minutes).** ID: 7553

## Create Monthly Sales Dashboard

### Описание:

Built an interactive dashboard for the sales team. Used Pivot Tables and Slicers to allow filtering by Region and Manager. Connected the data source to an external raw data file.

**Результат: Visual report with 4 charts that updates in one click; used in weekly meetings.** ID: 7552

## Fix pricing model calculations

### Описание:

Debugged a financial model with broken nested IF statements. Replaced old VLOOKUPS with XLOOKUP for stability and added error handling (IFERROR) to prevent #N/A on the summary sheet.

**Результат:** The pricing sheet now updates automatically without errors when new products are added. ID: 7551 31.12.2025

## Clean up customer email list

### Описание:

Imported a raw CSV with 5,000 client records. Removed duplicates, fixed formatting errors in the "Phone" column (removed spaces and dashes), and validated email addresses using a basic formula.

**Результат:** Clean dataset ready for Mailchimp import; removed 300 duplicate entries. ID: 7550 31.12.2025

## Checking the webhook

Проект: CareerCodexCompany

### Описание:

good

### Примененные навыки:

Docker

**Результат:** Completed on time ID: 14 31.12.2025
